Professional Summary

DevOps Engineer with expertise in cloud computing, automation, and infrastructure as code. Proficient in AWS, Python, Docker, Kubernetes, and CI/CD pipelines, with hands-on experience in cloud infrastructure management, system automation, and container orchestration. Skilled in scripting, configuration management, and deployment strategies to optimize software delivery and operational efficiency. Strong understanding of DevOps methodologies, infrastructure as code, and scalable system architectures. Continuously developing technical expertise through independent projects and formal education. Background in tech sales, providing insight into aligning technical solutions with business objectives.

EXPERIENCE

SeaLights (Acquired by Tricentis) — **Enterprise Business Development Representative**
June 2023 – present

- **Engaged with engineering and DevOps teams to promote software quality intelligence solutions.**

- **Gained a deep understanding of CI/CD, cloud-native technologies, and software testing processes.**
